INTRODUCTION

My name is Nikoleta Stefanova and I am specialized in Test Automation and Test Management. I am studying Computer Science at the University of Vienna. I have also serious passion for Front-end Development and creating intuitive, dynamic user experiences. I like to code things from scratch, and enjoy bringing ideas to life in the browser

I don't like to define myself by the work I've done. I define myself by the work I want to do. Skills can be taught, personality is inherent. I prefer to keep learning, continue challenging myself, and do interesting things that matter.

Fueled by high energy levels and boundless enthusiasm, I'm easily inspired and more than willing to follow my fascinations wherever they take me. I'm passionate, expressive, multi-talented spirit with a natural ability to entertain and inspire. I'm never satisfied to just come up with ideas. Instead I have an almost impulsive need to act on them.

MY VISION

Technology changes fast, and website design trends are no different. Design elements and website features that were once modern and innovative may have become tired, overdone, and clichéd in recent years. So here I am - combination of all classics and the new modern tech visions.

One of the most important web design standards is ultra-fast load time. Quick loading times have been essential factors in UI and SEO for years, and it continues to be a top priority for websites that want to rank well and convert better.

Micro Interactions and interactivity are one of the most important things for me. I also like to break up sections with fluid organic shapes or to use them in the background and behind products on their homepage, inspired by Android.

Flat Design and Thumb-Friendly Mobile Navigation are always two things with priority for me when I work on a projects.

BIOGRAPHY

My journey in the IT world started already at the age 14 when attending the High School for Foreign Languages where I learned German (C1) and English (B2/C1). During my first month in High school I passed an exam for the programmer's class with the highest grade and entered, so I started my best journey ever that actually built my future.

During my education in Bulgaria I won many awards, my work has also been recognized by some of the biggest names in the industry and this got me my first practice at the age of 15 in one of the biggest companies in Bulgaria - Information Services (IS) Varna.

After graduating, I came to Austria and started my university degree (BSc Informatik) at University of Vienna. Why Austria? I made one of my biggest dreams comes true.

The screenshot shows a search results page from the website eg-dobrich.com. The search query was "Николета+Стеванова". The results are titled "SUCHERGEBNISSE: NIKOLETA STEFANOVA". A red box highlights the link "STARTSEITE / SUCHERGEBNISSE FÜR: NIKOLETA STEFANOVA" and the text "50+ ERFOLGE IN MATHEMATIK UND INFORMATIK". Below this, there are two main sections: "ERFOLGE IN MATHEMATIK" and "WEIHNACHTSWETTBEWERB". The "ERFOLGE IN MATHEMATIK" section includes a news item about the Osterwettbewerb in Mathematics on April 22, 2017. The "WEIHNACHTSWETTBEWERB" section includes a news item about the Mathe-Weihnachtswettbewerb on December 19, 2016.
